Kingsoft Cloud Files Annual Report on Form 20-F for Fiscal Year 2023 and Releases 2023 Environmental, Social and Governance Report

BEIJING, April 30, 2024 (GLOBE NEWSWIRE) -- Kingsoft Cloud Holdings Limited ("we," "Kingsoft Cloud" or the "Company") (NASDAQ: KC and HKEX: 3896), a leading independent cloud service provider in China, today announced that it filed its annual report on Form 20-F for the fiscal year ended December 31, 2023 with the Securities and Exchange Commission ("SEC") on April 30, 2024. The annual report can be accessed on the Company's investor relations website at http://ir.ksyun.com as well as the SEC's website at http://www.sec.gov.

The Company will provide hard copies of its annual report containing the audited consolidated financial statements, free of charge, to its shareholders and ADS holders upon request. Requests should be submitted to ksc-ir@kingsoft.com.

In addition, the Company has published its 2023 Environmental, Social and Governance (ESG) Report (the "ESG Report") to provide an in-depth review of the Company's progress in the past year in its ESG practices, including business ethics, responsible operation, talent development, green development, sustainable supply chain, and corporate responsibility.

In 2023, we were awarded as a member out of a total of TOP 88 companies in the first edition of S&P Global's Sustainability Yearbook (China Edition)

We have improved our ESG practices, including but not limited to:

· We have been developing our Wuhan Research and Development Center since 2023. By the end of 2023, the total number of employees (including full-time, interns and outsourced employees) in Wuhan has exceed 500, around 40% of all the research and development employees.

· In May 2023, Kingsoft Cloud held an event under the theme "Gathering Together, Shaping the Future" with core partners, introducing the Company's future industry positioning, organizational improvements within the supply chain, updated procurement processes, and procurement planning. This event aimed to build strong partnerships with suppliers and promote the sustainable development of the supply chain.

· In 2023, Kingsoft Cloud has passed the annual review of TRUSTe Enterprise Privacy & Data Governance Certification by TrustArc, and obtained the Data Protection Trustmark (DPTM) Certificate from the Infocomm Media Development Authority of Singapore (IMDA).

· We have disclosed the GHG emissions for Scope 3, including the emission data from purchased goods and services, capital goods, employee commuting, business travel and fuel and energy related activities not included in Scope 1 and Scope 2.

Statement from the Chairman

In this fast-changing era, Kingsoft Cloud continues to explore the best practices of integrating social responsibility and business value in response to changes in domestic and international policies, social environments, and the expectations of various stakeholders. Leveraging our technological advantages, we incorporate the concept of sustainable development into our business in a more systematic way, and actively take actions to implement practices of low-carbon sustainable development and facilitate low-carbon transformation within the industry.

We continuously enhance our corporate governance capabilities. Kingsoft Cloud actively responds to national development strategies, constantly optimizes the ESG governance structure and system, and integrates ESG into business operations and daily management. We continue to promote the diversity and independence of our Board of Directors, maintain close communication with various stakeholders, and actively respond to their expectations. We focus on ESG-related risks and opportunities, steadily driving the Company's sustainable development with a more mature governance system.

We consistently promote business ethics. In 2023, we implemented various measures to firmly uphold ethical boundaries in business. We conducted the company-wide audit of business ethics, strengthened integrity controls in key risk areas and risk groups, carried out the annual departmental integrity inspections and interviews, and strengthened the cultivation of business ethics awareness among executives and employees through a variety of activities and training. In addition, we continue to improve our intellectual property management system by respecting and safeguarding both our intellectual property rights and those of third parties, and to work with industry peers to jointly create a favorable ecosystem for innovation.

We regard innovation as our core driving force. Upholding the principle of "building success based on technology and innovation", we are committed to providing customers with high-quality and efficient cloud products and services. In 2023, we have launched the new artificial intelligence product and technology development strategy, to continuously strengthen the Company's core competitiveness in the fields of big data, artificial intelligence, and other areas. As a leading cloud service provider, we continue to accelerate technological innovation and deliver excellent products and services to our customers, while focusing on safeguarding data security and customer privacy, so as to make cutting-edge technology serve the society in a safer way.

We recognize talents as our most valuable asset. Focusing on every dimension of employee well-being, we constantly optimize the compensation management system and the performance incentive policy, and actively construct a fair and effective promotion and development system to ensure that every employee shares in the fruits of corporate development based on their contributions. In 2023, we initiated the Wuhan Talent Strategy, started to establish the construction of the Kingsoft Cloud Wuhan R&D Center, set up the Kingsoft Cloud Star Academy with the R&D Center as the main body, and created the Kingsoft Cloud Star Campus, which lays a solid foundation for individuals to pursue high-quality employment and career development while cultivating promising technical talents for the construction of Digital China and the development of cloud computing industry.

We adhere to the green and low-carbon operation model. By means of green technologies and equipment, green operation and maintenance management, we continue to promote the green and efficient development of data centers in the planning, design, operation and other stages. All self-built data centers achieved the energy consumption targets for 2023. ESG Strategy

STATEMENT OF THE BOARD

The Board of Kingsoft Cloud is the highest decision-making body for ESG governance and fully accountable for the Company's ESG strategy and reporting. The Corporate Governance Committee of the Board oversees and makes recommendations on the management of ESG matters.

With reference to the results of materiality analysis on ESG issues, Kingsoft Cloud develops ESG strategies before integrating them into the Company's operation. The Board participates in the evaluation, prioritization, and management of important ESG issues. For detailed information on the specific evaluation process and results of ESG issues, please refer to the "Stakeholder Communication" and "Materiality Analysis" sections of this report. This year, the Company actively conducted work on important ESG issues related to privacy and data security, employee development and training, product and service stability and quality, etc., and the progress and results of the work on the corresponding key ESG issues have been described at the appropriate places in this report.

Kingsoft Cloud highly values the significant impact of ESG-related risks and opportunities and incorporates ESG risks into the risk management system. The Board participates in the assessment of ESG-related risks and opportunities, and continuously monitors the implementation of ESG risk management policies to ensure that the internal control system effectively identifies, manages and reduces ESG risks associated with business operations. This year, the Company conducted risk identification, assessment, and management work on ESG issues such as information technology, human resources, legal & compliance, climate change, etc.

During the reporting period, the Company has es management targets, and the Board has revie establishment of the targets and examined t environmental targets to continuously promote details of the review of the targets, please refe Development" section in this report.

This report discloses in detail the progress a Company's ESG work in 2023, which has been by the Board on April 30, 2024.

ESG GOVERNANCE FRAMEWORK

Kingsoft Cloud has established a comprehensive and complete ESG governance structure and management system to promote ESG governance and performance at three levels: governance, management and executive levels, and improve the Company's overall sustainable development performance.

In order to better integrate the concept of sustainable development into the Company's overall strategy, we have incorporated ESG objectives and achievements, such as business ethics and information security, into the CFO's objectives and key results (OKRs), and realized the linkage between executive compensation and sustainability performance. In addition, the Company issued the *Kingsoft Cloud Compensation Recoupment Policy*, which applies to, but is not limited to, the CEO, CFO, and Finance Director. The policy clearly stipulates that if material errors are found in the financial reports and the financial restatement are made as a result, the Company will recover from the relevant persons the excess amount of erroneously awarded compensation (including cash and equity) obtained on the basis of the materially incorrect financial reports. The formulation of this policy helps to raise employees' awareness of risk and responsibility, reduce the Company's legal risks and protect shareholders' rights and interests.

We have incorporated ESG objectives and achievements, into the CFO's objectives and key results

Kingsoft Cloud issued the *Kingsoft Cloud Compensation Recoupment Policy*

MATERIALITY ANALYSIS

To fully understand the expectations and demands of various stakeholders for the Company's ESG work, better identify and manage our ESG risks and opportunities, and respond to stakeholders' concerns in a timely manner, we communicate with stakeholders through regular reports and announcements, emails, products and other means.

We identified 18 key issues according to global sustainability goals, Exchange requirements, investor concerns, domestic and international policies, and overall company strategy. We actively communicate with internal and external stakeholders to understand their suggestions on Kingsoft Cloud from the two dimensions of "materiality to Kingsoft Cloud" and "materiality to stakeholders" of each ESG issue, and rank the importance of key issues. This year, we evaluated 9 issues of high importance and 9 issues of general importance, and generated a matrix of ESG issues based on the assessment results as follows:
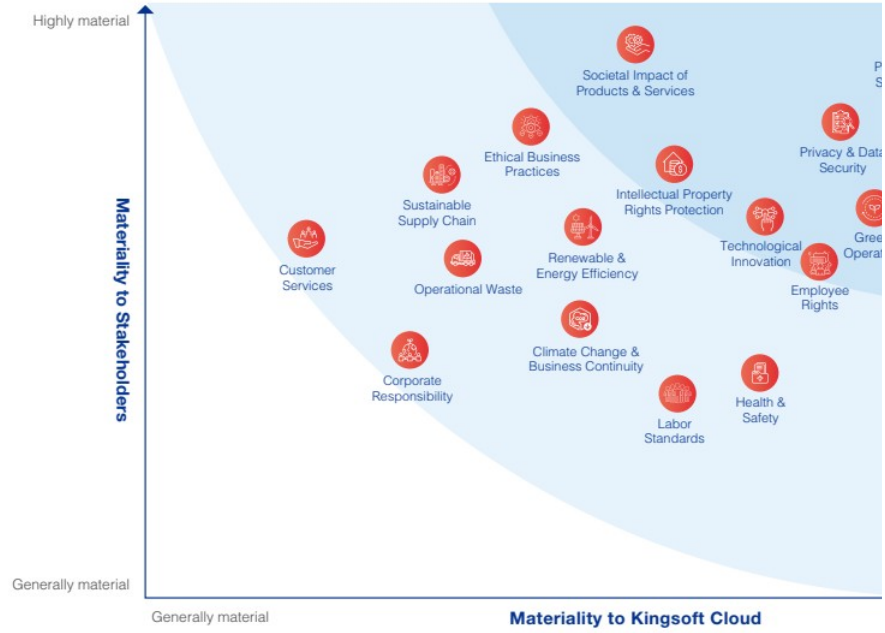

03

Business Ethics

Kingsoft Cloud strictly abides by the relevant laws and regulations of the places where it operates and requires all employees and partners to adhere to business ethics, and jointly establish a business ecology of compliance, fairness, and mutual trust.

BUSINESS ETHICS

INTELLECTUAL PROPERTY MANAGEMENT

Intellectual property ("IP") serves as the vital assets in cultivating brand competitiveness and achieving business breakthroughs of Kingsoft Cloud. The Company strictly complies with laws and regulations related to intellectual property protection, such as the *Patent Law of the People's Republic of China*, the *Copyright Law of the People's Republic of China*, the *Trademark Law of the People's Republic of China*, and the *Advertising Law of the People's Republic of China*. In addition, the Company keeps optimizing the integrated management system covering patents, copyrights and trademarks to strengthen IP protection.

Protecting Our Independent Intellectual Property

We emphasize the importance of the independent intellectual property protection and keep strengthening its life-cycle managem

This year, the Company revised the *Kingsoft Cloud Measures for Intellectual Property Management* to further restrict the delivery source codes by listing non-deliverable IPs categories and establishing strict approval processes for deliverable IPs, to further and delivery of independent IPs and strengthen the protection of the Company's intangible assets. For trade secrets for which rights have been applied for or granted, the Company established a unified management system, and released and implem *Management Measures of Kingsoft Cloud*. We have strengthened the confidentiality management of important information and trade secrets such as technical data, source codes, product design documents, achieving coordinated and unified manage intellectual properties and trade secrets.

The Company has established a strict review mechanism for the protection of trademarks and brands. Any external use of the joint review of the Marketing Department, the Capital Market Department and the Legal Department with a written authorization. In the Company's IP rights, or impairing the rights and interests of the brands, the Company will immediately trigger the emergen to minimize the negative impact of infringements and effectively defend Kingsoft Cloud's intellectual property rights as well as interests.

Emergency Response Mechanism

Ask

The Legal Department learns about the information of the issues upon communication and verification with relevant departments, and figures out the response mechanism quickly

Fix

The Legal Department leads the work of handling infringement issues via consultation, response and communication; in case of special circumstances, the Legal Department updates investment departments and the management on circumstance details, and proposes the adoption of the company-level response mechanism

The relevant depar parties involved (results. The Legal supplementary m with the Public Rel required, such as ir via media for maint relations, and re investors

Preventing Intellectual Property Rights Infringement

While protecting our own IPs, we respect and protect others' IPs. The Company monitors the latest patent applications and technical papers in the global patent database and the Internet domain from time to time according to technical characteristics and changes in product lines, and assesses the possibility of their hindrance to the Company's technical development to reduce the risk of the Company infringing others' IPs.

To avoid infringing third parties' IPs and to strengthen the management of genuine software, the Company launched the *Kingsoft Cloud Management Policy for Software Compliance* this year in which it clarifies the application process for the procurement and use of daily and special applications, therefore promoting the use of legitimate software.

The Company incorporates the key granted patents into the core IPs package and prepares strategic documents for similar patents in the industry to prepare for possible patent infringement lawsuits and to avoid patent invalidation. In case of infringement complaints, the infringement emergency response team formed by the Legal Department and relevant departments will carry out infringement emergency process in accordance with the company-level management mechanism, and deal with the relevant issues in accordance with the law.

Over the past decade, Kingsoft Cloud has been widely recognized for its IP management and protection. The Company has been awarded as Beijing Intellectual Property Demonstration Corporation, National High-tech Enterprise, China Intellectual Property Excellent Management Team, Excellence Award of China Patent Award, and National Intellectual Property Advantageous Enterprise, etc. In 2023, the Company successfully passed the annual assessment of National Intellectual Property Advantageous Enterprise, marking that the Company's IP deployment and management level had been certified at the national level.

Intellectual Property Promotion and Education

In 2023, the Company conducted 10 IP-related online and in-person training sessions in various forms. These sessions covered employees from various product lines, such as cloud computing, cloud storage, and digital healthcare.

Kingsoft Cloud 426 Special Event on Intellectual Property

This year, the Company organized a special event during the World Intellectual Property Day on April 26. In the activity, the Company conducted IP promotion among all employees through announcements, emails, posters and other channels, and launched educational videos and introduced award-winning questions on IP protection. During the event, employees from all departments of the Company took the online tests a total of 651 times. The event enriched employees' knowledge of intellectual property and raised their awareness of IP protection.

Intellectual Property Open Day

In April 2023, Kingsoft Cloud invited 60 representatives from 51 enterprises to participate in the "Intellectual Property Open Day", where the Company demonstrated its IP achievements and management experience to famous enterprises, law firms and organizations, reinforcing the Company's profile of respecting IP achievements and defending IP rights.

Intellectual Property Cooperation

Kingsoft Cloud actively carries out IP cooperation and is committed to creating a favorable innovation ecology in the industry. The Company has joined the Internet Intellectual Property Opening and Cooperation Alliance as the chairman company. We have led other alliance members to jointly carry out cooperation on IP operation and licensing, industrial technological development and the study of trends in patent deployment, etc., and established the joint defense and risk response mechanism for overseas intellectual property.

This year, we assisted the Beijing Intellectual Property Protection Association and related enterprises to jointly set up the "Data Asset Management and Processing Ecosystem", the first original and cross-industry chain patent pool in the field of digital economy in China. With this patent pool, we can improve the utilization efficiency of idle IP resources and enhance the ability to profit from such resources.

Suiyuan Intellectual Property Forum in Nanjing

In December 2023, Kingsoft Cloud attended the Suiyuan Intellectual Property Forum themed with "Data Empowerment and Intellectual Property Protection", hosted by Nanjing Normal University. At the forum, Kingsoft Cloud delivered a keynote speech, sharing the Company's data IP registration, the basic logic of data transaction as well as different subjects' definition and requirements regarding data compliance, and put forward suggestions on how to build a proper management system for corporate data compliance. The forum is conducive to advancing the development of IP theories and practices, thus providing effective guidance for promoting the high-quality development of Jiangsu's digital economy.

Training on "Big Data, Artificial Intelligence and Data Asset Circulation"

In December 2023, Kingsoft Cloud assisted the Beijing Municipal Intellectual Property Office to conduct the training Intelligence and Data Asset Circulation". The training provided a detailed introduction to the actual functions and core features transmission and circulation, and elaborated on the latest technological trends and development opportunities for the breakth computing, and artificial intelligence. In addition, the training also compared the similarities and differences of key content policies in different regions and analyzed the far-reaching impact of Chat GPT on the IP industry. The training deepened participants on big data, artificial intelligence and data asset circulation, and promoted an in-depth implementation of data IP

INTEGRITY

Sticking to the "Integrity and Ethics" governance principle, Kingsoft Cloud strictly abides by applicable laws and regulations including the *Civil Code of the People's Republic of China*, the *Criminal Law of the People's Republic of China*, the *Supervision Law of the People's Republic of China*, the *Company Law of the People's Republic of China*, the *Anti-money Laundering Law of the People's Republic of China*, and the *Opinions on Strengthening the Development of a Clean Culture in the New Era*. In addition, Kingsoft Cloud regularly reviews and updates internal rules and policies such as the *Employee Manual*, shows zero tolerance for any form of bribery, extortion and fraud, and constantly improves risk prevention and management capabilities for anti-corruption and anti-money laundering.

Anti-corruption

Kingsoft Cloud actively carries out integrity control of key risk areas and risk groups, continuously increases input and manpower to deal with internal clues and cases, and reviews and traces back past events.

The Company keeps pushing ahead with the annual integrity inspections and interviews on departments. This year, focusing on the Public Services Department, the Financial Services Department and other business lines, the Company conducted interviews with relevant departments and personnel in terms of business processes, job responsibilities, business risks etc., to collect recommendations and clues, thus promoting the efficient implementation of integrity investigation and risk management.

We provide channels for integrity compliance counseling to help employees understand the rules and process of handling gifts and gratuities to reduce the risk of accepting gifts in violation of policies. In addition, we systematically identify areas with high corruption risks, such as potential conflicts of interest and illegal payment. We establish a response mechanism to reduce the risks of corruption behaviors along business process. We conduct company-wide business ethics audits every year, including accounts receivable, the use of vehicles, admission of procurement suppliers and other key business processes. Corrective actions are taken and monitored for any issues identified.

In 2023, there was no concluded corruption lawsuit against the Company or its employees.

For more information on anti-corruption in the supply chain, please refer to the section "Sustainable Supply Chains" – Supplier Capacity Building.

Fostering the Awareness of Business Ethics

We enhance anti-corruption awareness of all employees through a wide range of busi raising activities such as special training, video campaigns, graphic tweets, and mini ga a corporate culture of compliance, transparency and integrity.

This year, the Company carries out targeted integrity training according to specific cases

The Company provides new employees with integrity education and training so that they have a good knowledge of the current internal policies on business ethics.	The Company offers procurement staff and sales staff anti-fraud empowerment training through channels such as interviews, training meetings, and learning & testing. These training sessions cover topics such as laws and regulations, case study, risk prevention, and integrity guidelines.	Kingsoft Clo and other conduct a integrity tra to help the sorting out important and regula corruption p corruption important co

Business Ethics Education Activities

In 2023, the Company launched a number of online and offline business ethics education programs, mainly including the following:

- Nearly 30 integrity publicity documents were published and the *Measures for Registration and Submission of Gifts and Monetary Gifts* was released to all employees through "Integrity and Ethics" of our Kingsoft Teams official account.
- All employees including Directors, management, general stuff and interns participated in the integrity training and took integrity tests.
- Experts were invited to give lectures on the *Case Study and Prevention of Job-related Crimes in Enterprise* and other topics.

Integrity Building Activity: "Embracing the Sunshine of Integrity"

In October 2023, the Integrity Awareness Month, Kingsoft Cloud organized employees, including employees at all levels, outsourced employees, employees under labor contract and interns, to participate in the integrity building activity themed with "Embracing the Sunshine of Integrity", held in the Xiaomi Science and Technology Park (hereinafter "the Park"). The activity includes interactions such as integrity quizzes, interactive games, demonstration of cautionary cases, and on-site lectures given by policemen, to raise employees' integrity awareness and help build a clean workplace.

Themed Education Activity: "Integrity Coffee"

In 2023, the Company carried out more than activities with the theme of "Integrity Coffee coffee to employees to effectively improve er and help the Company fully understand how wel integrity, detect clues of non-compliant condu and further promote the construction of an integ we published relevant educational materials, lega other contents through "Integrity and Ethics" of account. The pass rate of the integrity tests for a year was 92%.

Whistleblowing Mechanism and Whistleblower Protection

Kingsoft Cloud encourages all relevant stakeholders and the public to report the corruptions and frauds of employees or related person. We encourage real-name reports and also welcome anonymous reports. This year, we set up the Integrity Monitoring Service Desk to provide employees with a 24-hour online reporting channel. The Company handles reported information and clues by category in accordance with the *Kingsoft Cloud Measures for Complaints and Whistleblowing Management* to improve the efficiency of handling and resolving reported problems.

The Company complies with the whistleblower system issued by the U.S. Securities and Exchange Commission (SEC) and strictly protects whistleblower information. Any infringement of whistleblowers' privacy or any retaliation against whistleblowers, witnesses and investigators will be punished severely and, if constituting a crime, will be transferred to judicial authorities in accordance with the law. Once reported cases are verified, the Company will reward whistleblowers appropriately.

The integrity report platform has been established on our website where the reporting notice and channels have been disclosed.

Responsible Operations

At Kingsoft Cloud, we are committed to upholding the value of "customer first, building success based on technology and innovation". While ensuring data security and personal privacy, we have been committed to providing our customers with premium products and services driven by technical innovation and progress. We remain steadfast in our commitment to supporting the healthy and sustainable development of businesses.

PRODUCT AND SERVICE EXCELLENCE

As a leading high-quality cloud service provider, Kingsoft Cloud continuously improves the quality of products and services by taking standardized and systematic measures. We are committed to providing customers with "industry-leading and high-quality cloud services" and to becoming "our customers' most trusted cloud partner".

By leveraging our extensive infrastructure, we have developed modularized cloud products relying on the extensive cloud infrastructure, and customized solutions for enterprises and institutions in different industries to cater to customer demands. By doing so, we fully unleash the potential of infrastructure resources and provide customers with safe, reliable, stable and high-quality cloud computing services, contributing to enterprises' sustainable development.

Quality Assurance

In order to ensure the effective implementation of quality management, the Company has set up the Technology Platform Center to coordinate and manage quality-related work, and merged the business operation and maintenance teams of each product line into the Technical Assurance Department, therefore improving the efficiency of communication and collaboration between business lines and the Technical Assurance Department. This year, the Company established a quality assurance team led by the Vice President on the basis of the existing quality management structure, with each product line appointing one quality specialist to follow up on the implementation of departmental quality management. We also included relevant quality indicators into the performance assessment for employees, encouraging employees to improve the quality and efficiency of their work and thus contributing to the overall quality management objectives of the Company.

Operational Stability

Kingsoft Cloud has implemented internal policies such as the *Kingsoft Cloud Data Center Access Technical Specifications and Kingsoft Cloud Server Hardware Introduction Specifications*. Focusing on factors such as potential hazard control, quality monitoring, operation and maintenance automation and emergency response, we have developed and improved quality management systems and technical specifications, and optimized quality control processes to ensure the operational stability of the cloud platform.

Potential Hazard Control

Potential hazard control is crucial for ensuring t cloud services. We have stepped up efforts in control, identified and handled risks in the busin manner, and improved our infrastructure to pr system failures.

By taking a range of optimization measures, th improved the quality of software code to enhance and reliability of software. This year, we carried system through user operation simulation, chec cloud network and cloud storage code in peak tr ensure the stable performance of cloud services

The Company identifies possible risks by me review and evaluation of business structure, and management measures. This year, we identified failure of the cloud computing system or jeopard storage, and took targeted measures to eliminate

This year, we also made comprehensive upgrad This includes improving the server room mana skills of employees in the data centers, to si service quality. In 2023, we replaced aging equipment and upgraded the network architectu system to ensure the stable and continued oper of failure. And we also upgraded software and timely manner to enhance the system stability an

Product Quality Monitoring

In strict compliance with the *Kingsoft Cloud Service Monitoring Comprehensiveness Review Checklist* (hereinafter "the Checklist"), the Company monitors basic indicators including physical equipment and operating system. Outliers will be reported immediately upon instant alerts. All basic indicators were monitored this year. For cloud services not yet launched, we review basic indicators against the Checklist. For cloud services that are already online, we regularly conduct inspection to ensure that those services continuously meet the Checklist requirements during the subsequent maintenance and change process. This year, we conducted a systematic risk and potential hazard mapping against the Checklist and the software architecture diagram of the Company, and fixed all potential failures found during the mapping.

Change Operation Management

The Company has formulated the *Change Management Specifications* and built the Aoge Cloud platform for operation & maintenance changes. This platform offers a range of functions such as automatic writing of change operation programs, change process control, and change policy control, enabling online, standardized, and seamless change operations, reducing change risks and enhancing the stability of cloud services. During the year, there were zero failures due to changes in the platform.

Operation and Maintenance Automatic

To handle common failures in the computing ar during operation and change, we integrate cor frequent and repetitive problems and their sol system, an automated operation and maintenanc automates cause analysis and failure repair with etc., thereby improving the efficiency and accu In 2023, we achieved the white screen rate[7] of 93

Emergency Response Specifications

We standardize the handling process of major incidents through the Kingsoft Cloud WarRoom, a service failure emergency command platform, and effectively allocate resources to realize fast response, recovery and resolution. This year, we developed a range of emergency plans for different failures, covering scenarios like storage server failure, network access interruption, computer room failure and traffic control. We also formulated the *WarRoom Troubleshooting White Paper* to further standardize the troubleshooting process and ensure clear division of duties and cooperation between troubleshooters from all teams, so as to improve the troubleshooting efficiency and enhance the customer recognition and satisfaction.

Awareness Promotion

To ensure the stability and continuity of our b have organized employees to study the *Kings Specifications for Operation and Maintena* the *Kingsoft Cloud Management Specificatic Maintenance Security*. We aim to avoid sec failures due to employees' lack of security av and maintenance violations by helping employ operation and maintenance, login, and operatio we organized exams to check employees' l achieved a 100% pass rate for frontline oper personnel.

❼ White screen rate refers to the percentage of operations accessing the site reliability engineering number of maintenance operations.

Service Quality Assurance

Kingsoft Cloud always upholds a "customer-centric" approach and is committed to providing customers with satisfactory service experience. This year, we focused on customer service proactivity by formulating the *Active Service Action Guide*. In addition to meeting stated demands from customers, we proactively seek to identify potential needs from the customer's perspective and offer tailored professional advice accordingly. The Company has updated its after-sales service system, and revised the service system documents in three key areas of standardization, management, and process, thus further standardizing the operations of our after-sales team.

The Company has set up a specific customer service team to support the efficient and stable operation of cloud systems for customers. Besides, we have a team of senior technical experts who work alongside our frontline customer service team to standardize their work, therefore reducing the response time and improving the problem tackling capabilities. Meanwhile, we offer various service models based on the different requirements of our customers. We assign dedicated VIP after-sales personnel in the technical domain. The assigned personnel are responsible for helping customers solve problems quickly in a professional way after a full understanding of their product operating environment. For core customers who use our products on a large scale, we introduce a virtual team of Technical Account Managers (TAMs) to assist VIP after-sales personnel. Focusing on our core customers' industry features, product usage, technological needs, and service requirements, the TAMs team engages in frequent and in-depth discussions with them to better understand their business structure, needs, and pain points, laying a solid foundation for providing them with tailored consulting and planning support. This year, our TAMs virtual team completed a total of 137 proactive visits and service reports. We have also launched the "Multi-Cloud Resource Alarm" and "Kingsoft Cloud Advisor", providing robust support for monitoring, inspection, troubleshooting, and other services.

Empowering Service Teams

While continuously improving our service quality assurance mechanisms, we are committed to nurturing an after-sales service team that excels in both service proficiency and quality.

The Company actively organizes diverse empowerment training, such as video learning, practical exercises, case studies and FAQs. Based on dimensions such as industry, product, and job roles, we have developed a comprehensive list covering attitude, skills, and knowledge development for our service personnel. Serving as a guidance, this list requires service teams to master their respective proficiency. This year, we further intensified our efforts in enhancing training quality through various measures, including random training inspections, questionnaires, tests, periodic skill assessments, analysis of assessment results, and training interviews. Based on the results of these assessments, we made targeted improvements to our trainers, course materials, and examination contents to boost the effectiveness of our trainings. In 2023, we conducted a total of 193 thematic training sessions aimed at improving service quality.

We also provide business scenario-based training for our service teams, depicting a comprehensive customer profile from perspectives such as customer organizational structure, business architecture, and historical problems, to prepare failure response plans. We require that all business departments organize at least one case sharing session per week to discuss with customer service teams on problems encountered and improvement measures, ensuring a timely and accurate resolution of customer problems, and improving the professional proficiency of our teams.

Training Specifically Designed for Managers

This year, we introduced targeted empowerm[ent] designed for managers in our after-sales Serv[ice] to enhance their service awareness and ma[nagement]. Through weekly meetings and reports, we enabl[e] to reasonably delegate management authority cross-departmental communication and collabor[ation] deadlines, and take responsibility for results planning before action, diligent supervision thorough post-action reviews.

Customer Inquiries and Complaints

The Company has put in place standardized workflows of customer complaint handling and follow-up visits in accordance with the *Customer Complaints Management Framework*, ensuring efficient and high-quality handling of customer complaints and feedback.

We deliver 7*24 inquiry and complaint channels, including hotline, online support, technical order and expert services. By clearly defining the primary responsibility for customer management and establishing the first inquiry-based accountability system, we quickly respond to and handle the inquiries, fault reports and requirements of customers in a closed-loop manner. In addition, we have integrated our product research and development, operation and maintenance, and order system to further improve problem solving efficiency. This year, the Company expanded its channels for customer to inquire and complain. Customers are now able to access product and technical support through Kingsoft Cloud WeChat public account, which is directly linked to our after-sales service platform, enabling us to provide customers with one-stop inquiry services.

In 2023, the artificial intelligence team of Kingsoft Cloud introduced the "QZHOU" question-and-answer system, which leverages robotic process automation. This system utilizes generative AI to manage, retrieve, filter, summarize, extract, and discern knowledge, thereby significantly improving the accuracy and professionalism of our post-sales responses. After the rollout of the version 1.0 of "QZHOU" in 2023, it provided after-sales personnel with services such as intelligent documentation, knowledge tracing, and dialogue and knowledge management. These services assisted after-sales personnel in efficiently resolving 70% of customer inquiries, thereby improving the efficiency and service effectiveness of the service team.

To reduce the repeated errors in the handling we turn complaints into the knowledge rep analysis, case study, FAQ generation, and kn The Company utilizes EZONE system to follow process, categorize and store common problems time manner. In 2023, we added 112 FAQ en product requirements. The total number of comp the knowledge repository is 4,560.

In 2023

Customer Complaint Handling Process

Complaint handling
- On-call response within 90 seconds
- Brief customers about handling progress and investigation direction every 15 minutes

Complaint handling report
- Present detailed handling reports to customers within 24 hours after complaints are solved

Subsequent improvement and follow-up
- Complete internal review and work out optimization and improvement plans within 24 hours after complaints are solved, and follow up the optimization and improvement results

Customer follow-up
- 100% customer follow-up

Service Quality Assessment

The Company requires customer service team to regularly set quantitative targets, and incorporates indicators such as "rate of resolution within 30 minutes" and "rate of invalid feedback to the back-end departments"[8] into the KPI of the teams, stimulating customer service personnel to provide quality services.

The Company organizes monthly service quality inspections for customer service personnel to standardize their workflow of communication with customers. According to the *Specifications on After-sales Quality Control Process*, we rate the customer service personnel in five aspects, namely problem response, work order specification, service attitude, communication skills, and sense of responsibility. We develop targeted improvement plans and supervise their implementation based on the scoring results to constantly boost the professional skills and service competence of our teams.

In 2023, the number of orders we received for customer service investigation and troubleshooting decreased by 3% compared to 2022, and we offered customer services up to 50,462 times. Furthermore, we received 90 customer complaints, achieved a response rate of 98.90% within 90 seconds, a resolution rate of 94.73% within 30 minutes, and a customer satisfaction rate of 97.43%.

[8] Invalid feedback to the back-end departments: The customer issues that cannot be solved by the customer service team due to its limited authority and capabilities need to be communicated to product R&D, operation, and maintenance departments for resolution. The rate of invalid feedback to the back-end departments refers to the percentage of customer issues that customer service teams should have been familiar with and able to tackle wrongly pass on to the back-end departments.

DATA SECURITY AND PRIVACY PROTECTION

Adhering to the concept of "user privacy first and information security first", Kingsoft Cloud has strengthened the foundation of data security from multiple dimensions, such as management system optimization, workflow standardization, awareness promotion and external cooperation to improve data security management capability in all aspects, and fully respect and safeguard users' privacy and data security.

The Company strictly complies with applicable laws and regulations related to data security and privacy protection, such as the *Data Security Law of the People's Republic of China*, the *Personal Information Protection Law of the People's Republic of China*, and the *Cybersecurity Review Measures*, and timely traces and identifies the laws and regulations that may have impact on our information security operation. We have formulated the *Kingsoft Cloud Privacy Policy*, the *Specifications on Data Security Management* and other policies to improve internal compliance management system for data security and privacy protection.

Governance Structure

Our Security and Privacy Committee (hereinafter the "Committee") consists of members from multiple departments, such as Compliance, Internal Control, Audit and Supervision Departments. The Company's CEO appointed the Vice President respo development as the Chairman of the Committee, the General Manager of the Legal Department as the Vice Chairman of independent Data Privacy Officer (DPO). The Committee is under the direct authority of the Board, and responsible for the coor and privacy protection under the supervision and guidance of the Board. For overseas data security protection, we have assi some of our overseas operations, responsible for overseeing data security and privacy protection of our local operations with and reporting directly to the Chairman of the Committee. This year, the Company has built the Working Group on Algorithm S members to further strength algorithmic security protection and ensure algorithmic compliance and content compliance.

In 2024, the Company held a Committee meeting, in which representatives from a total of 12 departments participated, to d data security and privacy protection encountered in the course of the Company's actual operations, and to propose targeted continuous improvement of the Company's data security governance system.

Data Security Risk Management

According to Kingsoft Cloud's Data Protection Impact Assessment (DPIA) process, we regularly conduct assessments on information systems. DPIA mainly evaluates the compliance with the principles of personal information protection in information collection and processing, as well as the impact of information processing activities on the rights and interests of other subjects, and identifies and manages the risks to the security of the Company's data. When the Company identifies new laws and regulations related to data security and privacy protection, major personal information security incidents occur, or business model, information system and operation environment have significant changes, the DPO will lead business departments to re-conduct DPIA and prepare the assessment report, which need to be approved by the Privacy Work Group, and the DPO will propose compliance recommendations and countermeasures in response to the assessment results.

This year, the Company has formulated the *Measures for the Detection and Emergency Management of Cybersecurity Threats* and made a lifecycle emergency response plan including incidents discovery, time confirmation, information reporting, and emergency response. We have also set up a special emergency response team to identify security vulnerabilities and issue vulnerability risk notices. At the same time, we actively collect industry security information, keep informed about supply chain security vulnerabilities, and notify each product team of the security information to carry out troubleshooting, therefore reducing the possibility of data risk events.

Besides, we initiate a number of practices to prevent data security incidents:

- Installed data leakage prevention system (DLP) on all the computers in the office to prevent the risk of information leakage.

- Invited third parties to carry out cybersecurity attack and defense drills by simulating attacks on Kingsoft Cloud products and assets, to identify security protection vulnerabilities, and formulate corresponding repair plans, thus improving the Company's data security protection system.

- Engaged third parties to assess the Company's security risks from three aspects: security management, security technology, and security operation, to clarify the key aspects for safeguarding Kingsoft Cloud's cybersecurity before formulating targeted rectification measures, and comprehensively promote the Company's security compliance capabilities.

- Held monthly review meetings for new product inception to implement the privacy design concept by evaluating the personal information and data security risk factors of new products and proposing targeted compliance suggestions.

- Kept track of applicable domestic and foreign legislation, policies and law enforcement trends monthly, and discussed typical cases with in-depth analysis.

User Privacy Protection

Kingsoft Cloud is committed to providing users services and high-quality experience. To this formulated the *Kingsoft Cloud Privacy Policy*, *ERN-SDK Privacy Policy*. Such policies have clar store and delete the personal information of use the provision of its website-based services, cloud and indicated the personal information rights use

In 2023, Kingsoft Cloud optimized its privacy protection for the personal information of overse that relevant privacy protection measures sl in accordance with local laws and regulation streamlined the process of deleting local in quit. For example, users have the option to w authentication information at any time through th on Kingsoft Cloud's official website, or they c accounts, resulting in the permanent deletion of private information associated with the accoun recovery.

KINGSOFT CLOUD PTE. LTD.

Enhancing the Information Security Awareness

Kingsoft Cloud has set the information security red lines according to *Data Security Red Line Policy* to prohibit data leakage by employees. New employees are required to complete information security courses and pass the exam within one month of onboarding. Meanwhile, we organize training on personal information security awareness for all employees (including outsourced employees and employees under labor contract) through online courses and offline publicity, to promote the development of information security culture. In addition, we encourage employees to learn professional courses accredited by the International Association of Privacy Professionals (IAPP) to strengthen their information security awareness.

Kingsoft Cloud initiates the phishing email simulation program, and arranges security awareness training for employees who fail in this program, minimizing the loss of the Company arising from phishing email attacks. We also post information security articles weekly in the "Organization Security Assistant" of Kingsoft Teams official account, such as security knowledge, and hot information security issues, and organize information security interaction activities irregularly. Through Kingsoft Teams "Organization Security Service Platform", we offer employees information security management policies, procedures and other contents to provide guidelines for employees to keep their work information secure.

This year, around the protection of data privacy and business secrets, Xiaomi Corporation, Kingsoft Corporation and Kingsoft Cloud jointly organized a data compliance seminar, discussing the industry's data compliance experience. This seminar enabled employees to better understand data compliance governance such as the key points of corporate lifecycle data processing, and the user rights response mechanism.

Co-building the Data Security Ecol

While continuously improving its own data Kingsoft Cloud has proposed strict requirem protection for its suppliers. Suppliers engaging required to conduct self-assessment according data compliance requirements of Kingsoft Clou suppliers that need to process mass data, we conduct supplier due diligence in terms of inform level, data compliance operation qualification, and complaint channels, and require suppliers agreements with us in order to ensure the da protection efforts of suppliers meet our requ possibility of information security accidents due of suppliers. The suppliers that dispose downstr to have corresponding information security qualification certifications, such as ISO 277 Management System Certification and ISO 270 Management System Certification, and strictl process of storage media in scrapped IT equip and information security.

DRIVING TECHNOLOGY INNOVATION

Guided by the management philosophy of being "technology oriented", Kingsoft Cloud continues to increase its investment in technology innovation, encouraging innovation in terms of technical talents, culture, and organization. This year, Kingsoft Cloud consistently strengthened the technology of its fundamental public cloud products and enhanced the competitiveness of its core offerings. Additionally, Kingsoft Cloud embarked on its R&D investment to propel the development of AI products, aiming to further solidify core competitive advantages in technology fields such as big data and AI.

The Kingsoft Cloud Technology Committee is tasked with assisting in the management of the technology development of the Company. This includes providing guidance on cutting-edge technology R&D, participating in discussion and formulation of the technical standards, promoting the cultivation of technical talents and the development of technology culture.

Technology Innovation Achievements

Kingsoft Cloud has been continuously optimizing and upgrading fundamental public cloud offerings, significantly enhancing the and software across areas such as computing virtualization, cloud hosting networking, elastic bare metal, and network v Furthermore, the Company has launched the Model as Service (MaaS) Mutual Trust Dedicated Zone Solution to bolster servi the realm of Artificial Intelligence Generative Content (AIGC). In terms of cloud storage technology, Kingsoft Cloud has full technology and provided the All-Flash Object Storage service. Additionally, the Company has tailored high-performance storage for large models, catering to the needs of AIGC application scenarios.

For more information about the product technology, please refer to Kingsoft Cloud's official website and Kingsoft Cloud's 2023 A

Technology Innovation Awards

Kingsoft Cloud's MaaS mutual trust dedicated zone solutions won the "**2023 Most Innovative AI Solution**" award jointly issued by China Internet Weekly and the Informatization Research Center of the Chinese Academy of Social Sciences.

Kingsoft Cloud was awarded the "**Top 50 2023 China Intelligent Enterprise**" by Dark Horse.

Kingsoft Cloud was awarded the "**2023 Excellent Digital Innovation Enterprise**" by Economic Observer.

Kingsoft Cloud was awarded the "**WISE 2023 Future Business King**" by 36 Kr as the "Enterprise of the Year in the Field of Artificial Intelligence".

Technical Talent Development

To foster and develop a sustainable R&D talent pool that drives the Company's long-term and high-quality growth, Kingsoft Cloud has formulated the Wuhan Talent Strategy. By leveraging the support of the governments and tapping into the rich talent resources of Wuhan-based universities, we aim to cultivate a talent hub in Wuhan for our future talent development.

In 2023, the Company launched the construction of Wuhan Research and Development Center, with the aim of attracting and recruiting technical R&D talents through campus recruitment, social recruitment, and the Kingsoft Cloud Star Campus program. This endeavor has led to a rapid expansion of the talent pool within the Wuhan R&D Center. By the end of 2023, the total number of employees (including interns and outsourced employees) in the Wuhan R&D Center had exceeded 500. In the process of building a talent base in Wuhan, Kingsoft Cloud Wuhan R&D Center collaborated with various entities, including Wuhan Kingsoft Corporation, Wuhan Kingsoft Office Software, Kingsoft Shiyou (Wuhan) and Xiaomi Wuhan, to deliver professional and technical talents to the national core technology fields like big data, cloud computing, and artificial intelligence, thereby contributing to the advancement of an innovation-driven digital economy.

The Kingsoft Cloud Star Campus (the "Campus")

The Kingsoft Cloud Star Campus is an important part of Kingsoft Cloud Wuhan R&D Center's talent pipeline development, and is also a component of Kingsoft Cloud's school recruitment. With an aim to strengthen students' professional competence and continuous development ability, the Campus focuses on improving students' practical and innovative abilities, and uses pre-employment training for college recruits to select outstanding talents. In 2023, during the first training program at the Campus, Kingsoft Cloud collaborated with Wuhan Institute of Technology to foster the integration of industry and education. This collaboration involved implementing course replacement mode and establishing practical training and internship centers, which facilitated the rapid cultivation of professional and technical talents, promoted the in-depth development of school-enterprise cooperation, and provided students with a broad platform for development and employment opportunities.

Prioritizing Talent Development

Placing talent strategy at the forefront of the Company's development, Kingsoft Cloud is committed to creating a workplace with equity and respect, diversity and inclusivity, and health and safety. We continue to improve the talent selection, promotion, and compensation and benefit system to fully protect the rights and interests of employees, and provide them with rich and diverse learning and development opportunities. With these efforts, we aim to enhance their sense of happiness and belonging.

Applicable SDGs

3 GOOD HEALTH AND WELL-BEING | 5

CREATING A HAPPY WORKPLACE

Kingsoft Cloud strictly abides by laws and regulations related to employment, such as the *Labor Law of the People's Republic of China* and the *Regulations on the Prohibition of the Use of Child Labor*. We have formulated and updated the *Employee Manual* to fully respect and guarantee employees' legitimate rights and interests in recruitment and employment, attendance and leave, communication and complaints, benefits and care, and other areas. Strictly implementing the *Kingsoft Cloud Human Rights Policy*, the Company firmly prohibits all violations of employee rights and interests such as using child labor and forced labor. We strictly review the identity information of applicants during the recruitment. In the case of child labor, we will actively assist in contacting legal guardians to resolve the issue. Once illegal employment is found, the Company will conduct in-depth investigations and seriously deal with such cases in accordance with laws and regulations and corporate policies.

In addition, we extract the key elements of talent profile to ensure better alignment between candidates and job requirements. The curricula vitae collected from various recruitment channels are automatically transferred to the Company's talent pool, and labeled them by industry, region, job, skills, etc. Candidates are automatically identified and activated based on the Company's job vacancies on a regular basis, thus enhancing the Company's talent reserve capability.

Diversity and Inclusivity

Adhering to the principle of equal employment, Kingsoft Cloud does not discriminate against candidates based on age, gender, race, nationality, marital or family status, health status or religion, and opposes all forms of discrimination in the workplace. We do not disclose the name and gender of candidates during the recruitment, providing equal interview opportunities to all qualified candidates. As of December 31, 2023, the proportion of female employees in executive management reached 20.93%, and female employees accounted for 34.02% of the total employees in the Company. We offer a number of exclusive benefits for female employees, for example, we set up nursing rooms and provide a variety of conveniences for pregnant employees.

In addition, the Company provides reasonable job opportunities for qualified candidates with disabilities. As of now, we have hired 44 employees with disabilities and provide them with salary and welfare.

34.02%

20.93%

■ The proportion of female employees in the Company

■ The proportion of female employees in executive management
Health and Safety

Kingsoft Cloud strictly complies with laws and regulations related to occupational health and safety such as the *Labor Law of the People's Republic of China*, the *Production Safety Law of the People's Republic of China*, the *Law of the People's Republic of China on the Prevention and Control of Occupational Diseases*, and the *Fire Protection Law of the People's Republic of China*. We also follow the policies formulated by Kingsoft Corporation, including the *Management Policy for Office Environment of Kingsoft Software*, endeavoring to create a safe and comfortable work environment for our employees and protect their health and safety.

The Xiaomi Science and Technology Park where our Headquarters is located has passed the certification of ISO 45001 Occupational Health and Safety Management System. We attach great importance to workplace safety, regularly conduct safety inspections, rectify identified safety hazards in a timely manner, and develop contingency plans for emergencies such as equipment failure. We regularly inspect the electrical circuits and relevant equipment in office areas for safety, and do not allow employees to use high-power electrical devices in office areas. At the same time, we conduct annual inspections of the fire extinguishers in the office and organize employees to participate in fire protection training to enhance their ability to respond to fire emergencies.

The office area where the Company is located is equipped with medical rooms, physical therapy rooms, and automated external Company also provides first aid kits on each office floor to guard the health and safety of our employees at all times. In addition with ergonomic office desks and chairs for comfortable working conditions.

Enjoy a "Slim" Summer

In practice of the corporate culture of "work happily all the time", Kingsoft Cloud launched a weight-loss competition for emplo this activity, we encourage employees to achieve the work-life balance and exercise for a healthy body. Rewards were give participate in the activity.

Employee Communication

Kingsoft Cloud continuously improves employee communication and feedback channels. Specifically, we attach importance to employees' opinions and suggestions on the work environment, work content, compensation packages, listen to their truest voices, and give timely feedback. Employees are entitled to report their requests in real name or anonymously through the CEO mailbox, internal control and audit mailbox, supervision mailbox, internal public mailbox, and to communicate directly with the department supervisors or Human Resource Business Partners (HRBP). The relevant departments are responsible for handling these requests and giving feedback in a timely manner in accordance with the Company's policies. In addition, the Company has smooth mutual communication channels that allow employees to express their requests directly to the management through online forums and open executive forums, and the management can also use the forums to listen to employees' opinions and suggestions. For employees who are permanently stationed at the project site, the Company arranges for regular communication with specialists, to understand and properly solve their needs and problems.

Human Resources (HR) Self-Service Desk

The HR Self-service Desk set up by Kingsoft Cloud provides 7*24 self-service consulting services and manual services for employees and assigns the most suitable internal experts to answer employees' questions. With a knowledge base carrying a wealth of HR-related information, the HR Self-service Desk can efficiently answer the questions of employees who come to consult, thereby effectively reducing the manpower investment of the HR Department in answering questions repeatedly.

7*24
self-service consulting services and manual services

The Company conducts an employee engagement survey every three years to understand employee feedback on business, career development opportunities and corporate culture. Based on the results of the employee engagement survey, and fully considering employees' expectations and suggestions for the Company, we take targeted improvement measures in three areas: corporate mission and vision, user-orientation, and talent development.

SUPPORTING EMPLOYEE DEVELOPMENT

Kingsoft Cloud is committed to providing comprehensive support for employees' growth and development. We have established a fair and competitive system of compensation and incentives for our employees, and continuously improve the talent training system and career development path to support them in achieving their career goals and individual values.
Compensation and Incentives

The Company's compensation system is based on the principle of the comprehensive compensation management, combined with incentive policies to share the fruits of the Company's development with employees. Every year, the Company cooperates with third-party professional organizations to conduct an industry-wide compensation study, which helps to review, adjust and optimize the Company's compensation system.

Employee Compensation System

Fixed compensation	Short-term incentives	Long-term incentives
Basic salary	Performance-related bonus: annual or semiannual bonuses	Share options

In 2023, the Company updated the value criteria of the compensation system reinforced compensation for employees with outstanding performance, and formulated differentiated compensation strategies based on different job sequences and classes of positions to ensure the market competitiveness of compensation levels. In terms of performance-related bonus, the Company has set targeted performance appraisal indicators for employees with different functions to gain better organizational performance and individual performance.

In terms of long-term incentives, the Company has implemented the *2013 Share Option Scheme*, the *2013 Share Award Scheme* and the *2021 Share Incentive Plan*. The employee share option incentive plan has covered approximately 65% of the Company's employees, including some frontline employees, middle managers, senior managers and members of the Board.

The "Golden Pointer" Award

Through the honor system construction, Ki the corporate culture and enhances the sens achievement of our employees. In 2023, we aw to employees who have outstanding performan of corporate culture, offered them exclusive and publicized through the Company's electr culture wall of honor, to inspire all employees positive progress, and promote the Company's
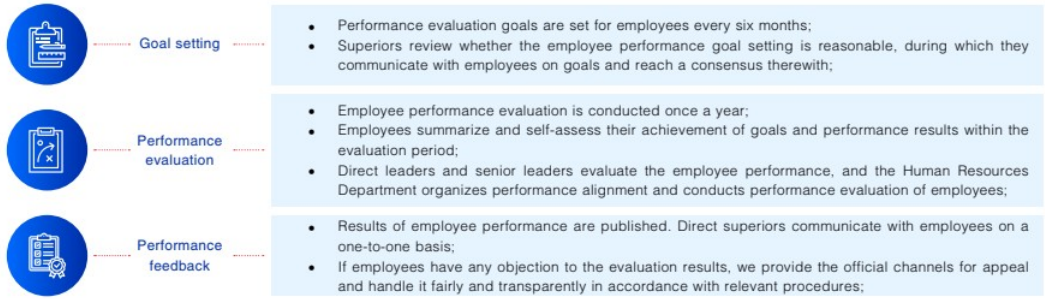

Presentation of exclusive certificates ▶

Performance Management

We uphold a goal-oriented performance management system that evaluates employees' performance in a fair and transparent manner through goal setting, performance evaluation and performance feedback, in order to promote the realization of corporate goals and individual performance objectives.

Goal setting
- Performance evaluation goals are set for employees every six months;
- Superiors review whether the employee performance goal setting is reasonable, during which they communicate with employees on goals and reach a consensus therewith;

Performance evaluation
- Employee performance evaluation is conducted once a year;
- Employees summarize and self-assess their achievement of goals and performance results within the evaluation period;
- Direct leaders and senior leaders evaluate the employee performance, and the Human Resources Department organizes performance alignment and conducts performance evaluation of employees;

Performance feedback
- Results of employee performance are published. Direct superiors communicate with employees on a one-to-one basis;
- If employees have any objection to the evaluation results, we provide the official channels for appeal and handle it fairly and transparently in accordance with relevant procedures;

Career Development

The Company offers employees a "dual career "professional development" and "manageme states clear career requirements and qualifica classes of positions to create a fair and just Employees can achieve their career aspiration choose "cross-channel" horizontal development broader development opportunities. In addit created an internal talent marketspace through to provide employees with internal transfer opp find development opportunities.
Dual Career Development Pa

Talent Cultivation

The Company attaches great importance to employee cultivation. We conduct targeted empowerment training for employees in different business lines and growth stages to enhance their skills in all aspects.

The Company provides employees with a wide range of online and offline training courses. To facilitate employees' learning, the Company has established a "Kingsoft Cloud Maiduo Learning Platform" resources and activities. To date, we have prepared and offered access to over 100 original business courses, contributing to employees' self-learning and growth.

06

Green Development

Kingsoft Cloud strictly complies with laws and regulations related to environmental protection, such as the *Environmental Protection Law of the People's Republic of China*, the *Energy Conservation Law of the People's Republic of China*, and the *Law of the People's Republic of China on the Prevention and Control of Environmental Pollution by Solid Wastes*, and actively responds to the national "3060" Dual-Carbon goals, and fulfills its commitment to green operations with actions. We pay close attention to climate change, strengthen the identification and governance of climate-related risks, continuously optimize the carbon emission management system, and incorporate green concepts into the daily operation of our data centers and office buildings, so as to promote the Company's low-carbon transformation and contribute to the green development of the economy through multiple approaches.

12

ADDRESSING CLIMATE CHANGE

Kingsoft Cloud attach great importance to climate change risks and opportunities, and proactively identifies climate change factors that will have certain impacts on the Company's operations. Kingsoft Cloud l of strategies and measures to address climate risks and opportunities in accordance with the actual circumstances, to guarantee the Company's green, low-carbon and sustainable development.

Physical risks

Acute risks

Sustained increase in the frequency and intensity of extreme weather events such as heavy rainstorms, floods, typhoons and heat waves

Impacts

Extreme weather may impact the constant temperature and humidity of server rooms, shortening the life of the equipment in server rooms and seriously affecting the safe and stable operation and business continuity of data centers

Assets and equipment, such as data center facilities and offices, suffer direct physical damage, increasing maintenance costs

Employees, customers, or business partners are more exposed to safety risks, and business operations may be disrupted

Responses

Set up extreme weather emergency operation procedures (such as EOP[a]) covering data centers and office area, and develop standardized response measures and mechanisms before, during and after the event. Meanwhile, carry out regular emergency training and drills on a daily basis to improve the data center's flood and typhoon emergency response capabilities in all aspects

Fully consider geographic location and local natural conditions when selecting sites for owned and leased assets and equipment, such as data centers and office buildings, so as to minimize the impact of extreme weather on the operational stability of data centers

Focus on the health and safety of our employees, establish emergency plans for extreme weather, reduce employee outdoor activities during extreme weather, and provide employees with protective equipment

Chronic risks

Increase in average temperature

Sea leve

Impacts

Increase in average temperature may reduce the efficiency of data center cooling systems and increase the energy consumption for cooling, leading to unstable operations and higher operating costs

Global warming and drought trends may lead to water shortages at data centers and office locations

Impacts

Sea level rise may inundate d locations in coastal areas, affectii of data centers

Frequent coastal erosion may such as optical fiber cables, res complete disruption of data trans

Responses

Continuously improve the data center climate change tracking and early warning mechanisms, and conduct thematic studies on environmental impact to reduce the impact of climate risks on the data center operational stability

When selecting sites for data centers and offices, identify and asses the regional water supply pressure, and appropriately design the site layout. Meanwhile, improve the water management system, strengthen employees' awareness of water conservation, and post signs to remind employees to conserve water

Continuously increase investment in R&D to actively develop water-free cooling technology, and optimize the server room cooling system through technological upgrades to improve cooling efficiency

Responses

Comprehensively consider the sit and offices in coastal areas ba level rise data, and reasonably p

Develop emergency respo transmission and communicat continuously improve the constr fiber cables and other infrastruct offices

[a] EOP: Emergency Operating Procedures.

Transition risks

Policy risks

Stricter requirements of the government and regulatory agencies

Impacts

Higher low-carbon development requirements for data center construction specifications and operational standards under the national "Dual-Carbon" strategy may increase the costs of data center construction and new technology development

Increasingly stringent power restriction policies, carbon emission-related laws and regulations, regulatory policies, and mandatory carbon trading policies may increase operational compliance costs of Kingsoft Cloud, which in turn may affect the normal operation of the data centers

Responses

Actively respond to national low-carbon emission policies to increase the proportion of clean energy use and ensure the compliant operation of data centers

Closely follow the climate change-related laws, regulations and policy requirements of the location where the data center operates to update the data center management specifications in a timely manner. Meanwhile, optimize the data center construction and operation plan with strict reference to national and industry standards

Pay attention to the energy consumption management of data centers and offices, and adopt more stringent energy use management measures, such as the establishment of an energy consumption assessment and risk warning mechanism

Technology risks

Technological development and application

Impacts

With the rapid development of low-carbon technologies such as energy storage and cold storage, failure to identify and apply emerging technologies may exacerbate the impact of climate change risks, and make the Company fall behind its competitors, thus reducing the overall revenue and increasing the pressure of competition

Responses

Continuously increase investment in R&D, expand the technical team and strengthen the intelligent information technology construction of data centers

Actively adopt advanced technologies such as heat dissipation by liquid cooling and waste heat recovery, and constantly explore the possibility of technological progress

Market risks

Operating costs

Impacts

Climate change, the transition to renewable energy and requirements for suppliers' climate performance may lead to higher costs for suppliers, and indirectly, to higher procurement costs for the Company

Climate change may lead to fluctuations in energy prices and the global energy transition may lead to changes in fuel costs and electricity mix. If the Company is unable to shift to a low-carbon energy mix, it may be exposed to international energy price volatility, resulting in higher operating costs

Responses

Assess the climate risks faced by suppliers and actively seek suppliers that are less vulnerable to climate change and more technologically mature

Provide support such as resources and training to suppliers to help them achieve a low carbon transformation quickly

Actively seek alternative energy sources and adopt a diverse, low-carbon energy mix to reasonably reduce operating costs

Market preference

Impacts

As public awareness of green consumption increases, green and low-carbon service providers are favored by customers, and this shift in market preference may affect the marketing of our core business. Therefore, revenues and market share may decline if we fail to meet market demand for low-carbon services

Responses

Make timely adjustments to respond to market demand for low carbon services, and establish efficient communication and feedback mechanisms to understand customers' business requirements, promoting the construction of low carbon data centers

New technologies provide us with more low-cost options in the use of renewable energy, energy saving, emission reduction, and other aspects, helping to further reduce carbon emissions while lowering operating costs	Providing customers with products and services that are in line with their green and low-carbon preferences and helping them achieve carbon neutrality in the value chain could increase our market share
Responses	**Responses**
Adopt advanced green construction technologies in the construction of data centers Actively promote the installation of photovoltaic power generation equipment and increasing the use of clean energy in the operation of data centers and office buildings in conjunction with other parties	Rationalize the allocation of resources to create low-carbon products and services and provide customers with choices of low-carbon products and services

GREEN DATA CENTER

The greenhouse gas emissions of Kingsoft Cloud are mainly from data centers. requirements such as the *Plan for Implementing the Requirements of Carbon Peak and C to Promote the Green and High-Quality Development of Data Centers and New Infr* formulated internal systems such as the *IDC Project Design Management Measures* and *Management Measures*, and continuously promote the green and efficient developmen stages of planning, design, and operation by adopting the green technology and equ and maintenance management, as well as other means. Based on the operation situati centers, we have set targets for energy use and water use, put forward PUE requireme centers, and incorporated PUE and other relevant indicators into the performance asses of data centers.

Environmental Targets and Requirements

Self-built Data Centers

• PUE and WUE Targets of Yizhuang Data Center:

	Targets in 2023	Progress in 2023	
Annual average PUE	Not higher than 1.365	1.362 (Achieved)	
Annual average WUE	Not higher than 2.01	1.98 (Achieved)	

• PUE and WUE Targets of Tianjin Yixianyuan Data Center:

	Targets in 2023	Progress in 2023	
Annual average PUE	Not higher than 1.40	1.379 (Achieved)	
Annual average WUE	Not higher than 2.06	2.01 (Achieved)	

Leased Data Centers

We prioritize environmentally friendly data centers and have PUE requirements for l example: For Changshu GLP Data Center: not higher than 1.36

Planning and Location Selection

We follow the green building standards such as the *Code for Design of Data Centers* (GB50174-2017), the *Energy Conservation Design Standards for Public Buildings*, and the *Evaluation Standards for Green Data Centers*, and regarding planning and construction, we uphold the concept of "not damaging the regional ecology" in the planning, design and construction stages of data centers, so as to build green data centers from the source.

During location selection, we comprehensively consider business needs, local energy distribution and temperature conditions, and prioritize areas with sufficient green energy such as wind and solar energy, which effectively reduces fossil fuel consumption in the operation of data centers and thus reducing the environmental impacts of operational activities. We highly value local temperature suitability and prioritize areas where natural cooling technologies can be applied to reduce energy consumption.

Prior to the construction of data centers, we file and obtain relevant approvals in accordance with the *Law of the People's Republic of China on Environmental Impact Assessment*. During the construction, we promote green and civilized construction with high standards and strict requirements, and strictly abide by the relevant requirements, such as the *United Nations Convention on Biological Diversity*, to avoid or minimize the impact of data center construction on biodiversity.

Green Technology and Equipment

We maximize the use of green technology and equipment, and improve the operational efficiency and reduce the energy consumption of data centers by various means such as a dynamic environmental monit

IT Equipment

- Rationally deploy IT infrastructure to reduce energy consumption and greenhouse gas emissions per unit of computing power.
- Reduce energy waste by choosing energy-efficient IT equipment, such as high-performance Reduced Instruction Set Computers (RISC).
- Develop a plan to replace old equipment and phase out inefficient equipment in the existing data centers.

Refrigeration System

- Adjust the operation strategy of the refrigeration system, improve the operation efficiency of the refrigeration system and further reduce the PUE of server rooms by using natural cooling sources, increasing the temperature of chilled water supply, and optimizing the operation efficiency of circulating water pumps. In 2023, Kingsoft Cloud Data Centers saved 875,000 kWh of electricity annually.
- We recycle the heat generated by equipment in data centers through waste heat recovery and builds a heat recovery unit system to provide winter heating sources for the office area to reduce CO_2 emissions by 222 tonnes in 2023.

Power Distribution and Supply System

- Continuously optimize the power distribution system architecture of data centers, prioritize the use of energy-efficient power distribution equipment, reduce power loss of the power distribution system, and improve the power transmission efficiency.
- Tianjin Data Center uses solar energy to provide domestic hot water for the park throughout the year, and the annual available heat is about 20 GJ, which is equivalent to the reduction of consuming 0.7 tonnes of standard coal.
- Tianjin Data Center plans to lay photovoltaic panels on the roof to provide power for the operation of water pumps, air conditioners and other equipment in the data center, and adopt advanced energy storage technology to reduce the operating costs of the data center.

Dynamic En Monitorin

Our dynamic environmental mo centralized monitoring of serve monitoring, failure alarm, eme recording and processing of re year, we deeply optimized the monitoring system, added ne reorganized the alarm threshol the accuracy and timeliness of problems and avoid energy was failure. In addition, we revised t Procedure (EOP) to ensure the centers based on the actual situa

Procedure name	Content
SOP[10]	Including the dual-channel planned power outage SOP, the diesel generator monthly no-load test and annual load test SOP, and the PDU[11] up (down) power SOP
EOP	Including the EOP of single-channel mains power outage and 10KV system dual-channel mains power outage (diesel generator self-starting), uninterruptible battery failure abnormal EOP, UPS input or output circuit breaker failure EOP, column head cabinet power supply interruption and low-voltage busbar automatic switching failure EOP, and air-conditioning equipment water supply system failure EOP documents; pipe and well pipe leakage EOP newly formulated this year
MOP[12]	Annual infrastructure operation and maintenance operations, training, exercise plans, etc.

[10] SOP: Standard Operating Procedure.
[11] PDU: Protocol Data Unit.
[12] MOP: Method of Procedure.

In addition, we have established an inspection mechanism to conduct quarterly inspec of all the leased data centers in terms of equipment operating parameters, operating s personnel management, and review of work records, as well as special inspections b on climatic conditions, the external environment, and other aspects, to identify environm risks, assist the leased data centers in formulating rectification plans and evaluate the r of the rectification, so as to eliminate operational hazards as much as possible.

Our patented technologies in cloud server storage, cloud analysis, private cloud deployment, cluster resource management, and other areas have significantly improved the efficiency of utilization of cloud service resources, providing customers with high-quality cloud services while effectively improving resource utilization efficiency.

Green Operation and Maintenance

During the operation of data centers, we clarify the requirements for using energy and resources, and take various measures to reduce the environmental pollution caused by wastewater, waste gas, noise, etc.

Energy Conservation

Within response to the global increase in energy consumption and the diminishing availability resources, we actively heed the national call for energy conservation and emission reduction by strengthening internal energy consumption management, formulating energy regulation and control measures, and promoting refined energy management at data centers.

- Implement the power rationing and supply guarantee plan by reducing the electricity consumption of non-business equipment and selectively turning off office air conditioning and lighting when necessary.

- Install energy-saving lamps, adopt intelligent lighting control systems, and limit the number of lighting fixtures regularly turned on in specific areas, which expects to save 1 million kWh of electricity consumption annually.

- For the UPS system running at low load, under the premise of ensuring the stable operation of the system, adopt the operation mode that involves withdrawing part of the UPS to minimize system losses while ensuring stable operation, saving more than 1 million kWh of electricity annually.

- Control the start time of the diesel generator set to reduce the idle time of the generators, and install a water jacket heating controller for the diesel generator set to reduce the number of starts and reduce the diesel consumption without affecting the normal operation.

- Promote the use of green electricity in leased data centers, facilitate the construction of distributed photovoltaics, and assist in the installation of photovoltaic power generation equipment in Shanghai SINNET server room and Pujiang GDS server room, with a total installed photovoltaic power capacity of 350 kW.

Water Resources Management

We take a variety of measures to effectively manage water use in data centers, and reduce water consumption by recycling and reusing water resources. We use water-saving equipment such as high-efficiency cooling towers and wet film humidifiers to reduce water consumption. We actively carry out rainwater recycling projects and build rainwater collection systems in the Park. We also build rainwater storage tanks and collect rainwater for clean use in the Park, saving 105 tonnes of water annually.

Saving 105 tonnes of water annually

In terms of wastewater treatment, data centers generate wastewater primarily from cooling tower cleaning and sewage discharge. This year, to reduce the wastewater discharge of data centers, while meeting the water demand of the refrigeration equipment, we optimized the cooling water discharge control systems of server rooms, ensured precise control of the wastewater discharge according to the water quality indicators, and increased the concentration factor to reduce the wastewater discharge. In addition, to prevent the wastewater from being discharged into the rainwater pipes, we installed temporary drainage pipes for chemically generated sewage during the cooling tower, and discharged it into the municipal sewage pipe after standard treatment.

Waste Gas Management

The waste gas generated by data centers is mainly from incomplete combustion of diesel generators. To reduce waste gas emissions, we increase the frequency of cleaning and replacing the filters of generator exhaust systems, and regularly maintain them to ensure the efficiency of waste gas filtration and that waste gas emissions comply with national standards, and minimize the impact of waste gas emissions on the natural environment.

Noise Management

The heating, ventilation and refrigeration syste centers are potential sources of noise and vi noise and vibration generated by the electromed centers, we have taken various measures inclu indexes and prioritizing low-noise equipment c and installing soundproofing and sound-absor rooms. During the year, we assisted a leased da noise levels to conduct an on-site noise ass rectification plan and promoted the implementatic thus thoroughly resolved the noise problem.

*Please refer to the "Low Carbon Office – Waste
this report for more information on waste disposa*

LOW-CARBON OFFICE

Adhering to the concept of low-carbon office, Kingsoft Cloud has formulated internal policies such as *Workplace Environmental Management Policy*. We have taken multiple environmental protection measures such as energy and water conservation and waste management in the office area. Additionally, we actively conduct environmental protection training to enhance our employees' awareness in this regard.

All construction and renovation projects of the Park where our Headquarters is located have passed a two-star level certification of the *Beijing Evaluation Standard for Green Building* and have also obtained Platinum level of Leadership in Energy and Environmental Design (LEED) Certification. In 2022, we set feasible environmental targets based on the operation in our office area. Progress made towards these established targets during the year is outlined in the table below:

Environmental targets	Achievement of environmental targets in 2023
Since 2022 our office areas[13] have achieved 100% garbage classification.	Achieved
Since 2022, 100% harmless disposal of hazardous wastes in our office areas have been conducted by qualified suppliers.	Achieved

Energy and Resource Management

Energy Conservation and Efficiency Enhancement

To further refine the management of energy-consuming equipment, we strictly control the operation of office equipment such conditioning, and elevators, effectively improving energy efficiency while ensuring normal usage.

| Lighting facilities	Air conditioning	Elevator facilities	
We have introduced inductive lighting technology in our main office areas to achieve automatic lighting. We have designated employees to inspect and switch off lighting facilities in idle office spaces at regular interval. Besides, we reduce the lights in inessential areas, and adjust the time to turn on street and logo lights according to weather conditions.	We set the parameters of air-conditioning systems, and adjust the running status of fan coils and ventilation equipment properly to reduce energy consumption for the operation of air-conditioning systems. In winter and summer, we maintain a constant temperature, ensuring that the systems run efficiently within specified operating hours tailored to seasonal and working patterns. In addition, we clean filters and screens for the fans and ventilation equipment regularly to improve the operating efficiency of equipment. Moreover, we conduct monthly energy consumption analyses to identify and address any irregularities or excessive energy usage.	We schedule the operating hours and adjust the number of elevators available based on peak and off-peak usage patterns.	We like a to su show

[13] The office areas refer to Kingsoft Cloud's offices in Xiaomi Science and Technology Park and the Xiaomi Wuhan headquarters office area. Among them, the Kingsoft Cloud's Wuhan office area has been operational since March 2023.

Paper Conservation

The Company advocates paperless office internally and externally. Internally, we employ an electronic document management system to process and store files, enabling employees to easily upload, access, and share documents while reducing paper consumption. Furthermore, we encourage printing on both sides and re-utilization of wastepaper for draft paper or secondary printing. In terms of external compliance, we have pledged to distribute relevant corporate documents to shareholders electronically since December 31, 2023 in accordance with the Rule 2.07A of the Hong Kong Listing Rules and the Company's Articles of Association. Besides, printed copies will only be sent out upon shareholders' specific requests.

Water Conservation

The Headquarter adjusts water pressure in the office according to the water conservation requirements of the Park so as to reduce the water flow of sanitary appliances in washrooms.

We also install water-saving equipment, and regular inspect sanitary appliances and valves in the office areas to reduce the waste of water resources caused by dripping and leakage.

When it comes to wastewater treatment, we treat wastewater generated in office areas through sedimentation and separation to meet national standards, and then discharge wastewater to the municipal sewage network.

Waste Management

We ensure that all types of waste are disposed of in full compliance with relevant waste disposal requirements, including *Administration of the Recovery and Disposal of Waste Electric and Electronic Products* and the *Beijing Municipal Regulations Domestic Garbage*, and our internal policies such as the *Kingsoft Cloud IT Property Management Policy*.
Garbage Classification

We set garbage classification bins on every floor in our office areas, and conduct waste sorting training for employees and sanitation workers. Additionally, the personnel at the property's waste recycling station conduct a secondary classification. The kitchen garbage from the canteen is uniformly handled by professional staff from the canteen.

Electronic Wastes

We maintain discarded equipment and components from our Data Centers, and hand them over to the office upon successful testing to extend their service life. For equipment and components that cannot be reused, we dismantle them to recover any usable parts for recycling. Any discarded electronic equipment that cannot be recycled is disposed by qualified suppliers specializing in recycling.

Hazardo

The key hazardous wa our operation include cartridges and used lead Data Centers. We return cartridges to their manu handling and engage q to dispose of used lead 100% environmentally fri manner.

Green Concept Advocating

The Company has taken various measures to promote the concept of environmental protection and encourage employees to Through our subscription service and promotional posters, we regularly disseminate knowledge about energy conservation and w employees to incorporate low-carbon practices into their work and daily lives. Additionally, we have posted signs in office areas conserve water and electricity, as well as reduce food waste.
GHG EMISSIONS INVENTORY

This year, we used the *GHG Protocol: Corporate Value Chain (Scope 3) Accounting and Reporting Standard (2011 Edition)* developed by World Resources Institute and the World Business Council For Sustainable Development to undertake inventory of Scope 3 greenhouse gas emissions.

This year, based on the results ⬚ emission inventory in combinati⬚ reduction practices, we set acti⬚ reduction targets to further prom⬚ carbon development.

Kingsoft Could pledges to re⬚ neutrality across operation b⬚

GHG emissions (Scope 1, 2 and 3)

Scope 1, 0.03%
Scope 2, 30.66%
Scope 3, 69.31%

Scope 3 GHG emissions[14]

Capital goods, 34.60%
Purchased goods and services, 61.31%
Fuel- and energy-related activities not included in Scope 1 or Scope 2, 0.60%
Employee commuting, 2.93%
Business travel, 0.56%

[14] For the five scope 3 GHG emission categories that were verified and disclosed for the first time, we comprehensively assessed and verified the data quality of each category, and included them in the scope of statistics if measured values were available and specific activities or business services could be identified; in the absence of measured values, the calculation was completed through scientifically sound estimation methods. In the future, with the enhancement of the quality of the underlying data for the five Scope 3 GHG emission categories, the coverage and accuracy of the data will be further improved.

ENVIRONMENTAL STATISTICS

Indicator	Unit	2022 Data	2023 Data
Total comprehensive energy consumption[1]	MWh	50,637.58	82,274.99[2]
Direct energy consumption	MWh	209.37	258.21
Indirect energy consumption	MWh	50,428.21	82,016.78
Total energy consumption per unit of revenue	MWh/RMB Million	6.19	11.67
Running water consumption[3]	Tonne	132,785.40	147,188.78
Running water consumption per unit of revenue	Tonne/RMB Million	16.23	20.89

Indicator	Unit	2022 Data
Total GHG emissions[1] (Scope 1 and 2)[2]	tCO_2e	35,850.34
Scope 1 GHG emissions	tCO_2e	53.43
Scope 2 GHG emissions	tCO_2e	35,796.91
Scope 3 GHG emissions	tCO_2e	–
Including: Purchased goods and services	tCO_2e	–
Capital goods	tCO_2e	–
Employee commuting	tCO_2e	–
Business travel	tCO_2e	–
Fuel – and energy – related activities not included in Scope 1 or Scope 2	tCO_2e	–
Total GHG emissions per unit of revenue (Scope 1 and 2)	tCO_2e/RMB Million	4.38
Non-hazardous waste	Tonne	329.54
Non-hazardous waste per unit of revenue	Tonne/RMB Million	0.04
Hazardous waste	Tonne	0.897
Hazardous waste per unit of revenue	Tonne/RMB Million	0.0001
Compliance disposal rate of hazardous waste	%	100

Note:
(1) The total amount of comprehensive energy consumption is calculated according to the conversion factors set out in the *General Rules for Calculation of Comprehensive Energy Consumption*, the national standard of the People's Republic of China. Direct energy consumption arises from the consumption of diesel and gasoline during Kingsoft Cloud's operation. Indirect energy consumption arises from the consumption of purchased electricity during Kingsoft Cloud's operation. The revenue used to calculate the density is aligned with our *2023 Annual Report*.
(2) The increase in total energy consumption in 2023 was mainly due to the gradual commissioning of the Tianjin Data Center since mid-2022 and its operation throughout 2023.
(3) Kingsoft Cloud uses municipal tap water as its water source, and in terms of water usage, the Company did not encounter any problems in obtaining water sources in 2023.

Note:
(1) Kingsoft Cloud's GHG inventory includes carbon dioxide, methane and nitrous oxide arising mai[n] by burning fossil fuels and the direct burning of diesel and gasoline. GHG emissions data is equivalent, and the calculation is based on the *2021 Baseline Emission Factors for Regional Power* Ministry of Ecology and Environment of the People's Republic of China, and the *2006 IPCC Guide[lines] Gas Inventories (2019 Edition)* issued by the Intergovernmental Panel on Climate Change (IPCC).
(2) Scope 1 GHGs: covers GHG emissions from gasoline and diesel fuel consumed by the Company['s] covers GHG emissions from electricity consumed by the Company (purchased or obtained); Scop[e] emissions from purchased goods and services, capital goods, employee commuting, business tra[vel] activities not included in Scope 1 or Scope 2.
(3) The increase in total GHG emissions in 2023 was mainly due to the gradual commissioning of the T[ianjin] 2022 and its operation throughout 2023.

SUPPLIER MANAGEMENT REQUIREMENTS

Guided by the *Universal Declaration of Human Rights* and the *ILO Declaration on Fundamental Principles and Rights at Work*, and following the *UN Guiding Principles for Business and Human Rights*, Kingsoft Cloud has formulated the Human Rights Policy of Kingsoft Cloud based on the corporate situation, and demonstrated a zero tolerance attitude to supplier violations of human rights. We explicitly require suppliers to comply with the following principles as a condition of cooperating with us:

1   Prohibit the use of child labor and forced labor

2   Eliminate unlawful discrimination to ensure equalization of job opportunities

3   Provide a safe and healthy working environment for employees

To further reduce ESG risks in the supply chain, the Company's supplier contracts incorporate clauses of anti-corruption, information security, intellectual property protection, etc. The Company requires suppliers to sign the *Supplier Code of Conduct*, *Cooperation Commitment Letter*, *Supplier Instructions* and other relevant documents, and promise that they will strictly comply with the relevant requirements of Kingsoft Cloud. In 2023, the percentage of suppliers that comply with the relevant management policies reached 100%.

The percentage of suppliers that comply with the relevant management policies reached

New Supplier Entry Procedure

Kingsoft Cloud requires suppliers to complete the *Supplier Qualification Survey Form* before admission. The Supply Chain Management, Finance, Legal, and other Departments evaluate suppliers from various aspects such as operational conditions, financial stability, industry qualifications, quality control, and ESG performance.

We classified our suppliers into equipment suppliers and service suppliers. Different ESG-related qualification requirements are set for different types of suppliers. Service suppliers are required to provide certification in areas such as occupational health management (e.g., ISO 45001) and information security (e.g., ISO 27001). Equipment suppliers are required to provide certifications in areas such as quality management (e.g., ISO 9001) and energy management (e.g., ISO 50001). The Company also conducts on-site inspections of suppliers' factory environment, production facilities, staffing and other factors. In addition, we pay attention to the health and safety of suppliers' employees, while examining key indicators such as employee wages, working hours, and social insurance payments.

Suppliers Evaluation and Exit

For suppliers entering Kingsoft Cloud's supplier pool, we require them to strictly comply with applicable laws and regulations. For suppliers that touch Kingsoft Cloud's red line, like corruption, poor product quality, etc., the Company would immediately terminate cooperation with the supplier.

The Company established the *Supplier Rating Form* to rate different types of suppliers on the dimensions including corporate qualifications, project capabilities, overall costs, and ESG performance. Suppliers are rated from top to bottom as S, A, B, or C level based on their performance. Annual evaluations are conducted for service suppliers, while quarterly or semi-annual evaluations are carried out for equipment suppliers.

Key ESG Issues in Supplier Assessment:

For service suppliers: Service quality, operation and maintenance qualifications, employee professional certifications, social insurance payment records, etc.

For equipment suppliers: Service and product quality, environmental labeling, labor management, employee health and safety, etc.

The Company gives priority to suppliers with incentive measures, and establishes exit mec with low ratings, we offer necessary guidance, to help them make timely improvements. Kings cooperation with suppliers who are rated C le evaluations.

Suppliers with Higher Rati

We give priority to those suppliers, and provi

Suppliers with Lower Ratin

We offer necessary guidance, training, and in make timely improvements

RESPONSIBLE PROCUREMENT

Green Procurement

Kingsoft Cloud sets different green qualification requirements for suppliers based on their types. The Company requires equipment suppliers to provide energy saving certificates, environmental label certification and other documents, and requires recycling equipment suppliers to provide waste electrical and electronic equipment treatment qualification. The Company prioritizes cooperation with suppliers that demonstrate outstanding performance in environmental protection.

Equipment suppliers:
Energy saving certificates and environmental label certification are required

Recycling equipment suppliers:
The waste electrical and electronic equipment treatment qualification is required

To further encourage suppliers to produce green products, actively take environmental protection-related measures, and promote the sustainable and low-carbon development of the supply chain, the Company provides incentive measures such as "advanced payment" based on the actual situation.

Conflict Minerals Management

The Company has formulated internal policies for managing conflict minerals with respect to human rights and the environment to guarantee the responsible procurement of all raw materials. We are committed to avoiding the use of conflict minerals that directly or indirectly fund local armed groups and to taking necessary measures to trace the sources of conflict minerals in our products. In addition, we include conflict minerals clauses in our contracts with suppliers, and suppliers that fail to comply with relevant requirements will face penalties including suspension or termination of the partnership.

Conflict Materials Management

Including conflict minerals clauses in [...] suppliers, and suppliers that fail to co[...] requirements will face penalties includi[...] termination of the partnership

SUPPLIER CAPACITY BUILDING

Kingsoft Cloud grows together with suppliers and continuously empowers suppliers' ESG construction by providing targeted resources and assistance. Through on-site visits and supplier exchanges, we engage in discussions focusing on integrity, product quality, and other aspects to jointly build a sustainable supply chain.

Supplier Capacity Building

Audit and Training

For new suppliers and existing suppliers introducing new products, we conduct on-site audits of their factory environment, staffing, and emergency response measures. Based on the results, we provide recommendations for improvement, and schedule regular follow-up visits once or twice a year to monitor improvement progress.

We assess and supervise the integrity building of suppliers through on-site visits and inspections. This year, the Company further expanded the scope of supplier visits, conducted on-site surveys and interviews with 32 suppliers, and promoted anti-corruption empowerment training for suppliers. These efforts advanced the prevention and management of integrity risks in the supply chain.

Strategic Communication with Core Partners

In May 2023, Kingsoft Cloud held an event under the theme "Gathering Together, S... core partners, introducing the Company's future industry positioning, organizationa... supply chain, updated procurement processes, and procurement planning. Fulfilling the Corporate Responsibility

Kingsoft Cloud actively assumes its corporate responsibility by applying its products, services and technologies to various fields such as healthcare and education. By integrating social responsibility into its products and services, Kingsoft Cloud contributes to industrial upgrading and promotes sustainable social development. In addition, we actively engage in public welfare. With careful consideration of community needs, we are committed to guaranteeing the effective implementation of public welfare resources.

Applicable SDGs

3 GOOD HEALTH AND WELL-BEING

4

CLOUD FOR GOOD

Kingsoft Cloud upholds the corporate value of "Cloud for Good". In the relentless pursuit of technological advancement, Kingsoft Cloud actively contributes to the society by leveraging its cutting-edge technologies. In 2023, Kingsoft Cloud contributed its efforts in healthcare and public service affairs.

Cloud for Healthcare

Jiangsu Image Cloud

In 2023, Kingsoft Cloud assisted the Jiangsu Provincial Government in completing the first phase of construction of the Jiangsu Healthcare Cloud Image Platform (Image Cloud). The platform integrates image data from more than 1,300 hospitals in the province, saving an estimated annual medical image cost of approximately RMB2.4 billion.

"Smart Chibi" Healthcare Service

Kingsoft Cloud assisted the Chibi Municipal Government to build a smart city. This partnership focuses on promoting the "Smart Chibi" project, with an aim to apply advanced technologies in a variety of public service scenarios such as healthcare and education. Kingsoft Cloud launched "Smart Chibi" healthcare service built upon its big data platform. This offering allows citizens to upload medical records and other health information directly to the cloud server in the community. Health records will then be generated for doctors to retrieve medical records and facilitate online diagnosis by medical experts. Appropriate health checks and disease prevention knowledge will also be automatically recommended to patients. The "Smart Healthcare" project makes it easier for patients to consult with doctors and provides access to better healthcare resources.

Kunshan Strategic Cooperation

In 2023, Kingsoft Cloud signed a strategic cooperation framework agreement with the Kunshan Municipal Health Commission. This agreement solidifies a strong partnership between the two parties, focusing on investments and the construction of a digital healthcare cloud. It also involves open operation of public data elements and the establishment of healthcare industry cluster. This cooperation aims to support the digital transformation of Kunshan's healthcare industry and promote the development of the city's digital economy and healthcare industry.

"Smart Chibi" Project

● **Digital Governance**

Kingsoft Cloud helps the Chibi Municipal Government to build a "city brain" data center. At present, nearly 900 catalogues of various types of public service data have been formed, and 15 basic and thematic databases have been established, providing strong data support for a range of public service affairs. In addition, Kingsoft Cloud contributes to the Chibi Municipal Government's "Internet+" public services. This collaboration aims to create an online and offline public service model that integrates social insurance, transportation, employment, housing, education, investment and other areas.

● **Digital Tea Garden**

Kingsoft Cloud, in collaboration with the Chibi Agriculture and Rural Affairs Bureau and other departments, has initiated a pilot project - "Digital Tea Garden". This project, focusing on the three sections of "digital tea garden, digital tea market, and digital tea management", involves the implementation of digital tea production full-cycle management systems, which includes a big data application system, an Internet of Things (IoT) intelligent monitoring system, an energy consumption monitoring system, and a tea garden VR display system. By setting up a credit system and developing a robust risk control system based on the platform data, Kingsoft Cloud successfully established an efficient and safe supply chain financial service platform for tea trading. The "Digital Tea Garden" project has created jobs for more than 30,000 people and increased the income of 5,000 tea farmers.

Kingsoft Cloud firmly supports the digital, intelligent and innovative development of Chibi City by actively engaging in "Smart Chibi" project. This year, "Kingsoft Cloud-Chibi Smart City Project" was awarded the "2023 Best Smart City Solution" in the field of public service affairs by China Internet Weekly.

PUBLIC WELFARE AND CHA

With a steadfast commitment to giving back t Cloud has been actively engaged in commun charity. In 2023, Kingsoft Foundation (herein was formally established. ESG Strategy Statement of the Board
Reporting Principles	
A description of, or an explanation on, the application of the following Reporting Principles in the preparation of the ESG report: **Materiality:** The ESG report should disclose: (i) the process to identify and the criteria for the selection of material ESG factors; (ii) if a stakeholder engagement is conducted, a description of significant stakeholders identified, and the process and results of the issuer's stakeholder engagement. **Quantitative:** Information on the standards, methodologies, assumptions and/or calculation tools used, and source of conversion factors used, for the reporting of emissions/energy consumption (where applicable) should be disclosed. **Consistency:** The issuer should disclose in the ESG report any changes to the methods or KPIs used, or any other relevant factors affecting a meaningful comparison.	About the Report
Reporting Boundary	
A narrative explaining the reporting boundaries of the ESG report and describing the process used to identify which entities or operations are included in the ESG report. If there is a change in the scope, the issuer should explain the difference and reason for the change.	About the Report

Subject Areas & Aspects		**Chapter**
A2：Use of Resources		
General Disclosure	Policies on the efficient use of resources, including energy, water and other raw materials.	Green Development Green Data Center Low-carbon Office
KPI A2.1	Direct and/or indirect energy consumption by type (e.g. electricity, gas or oil) in total (kWh in ´000s) and intensity (e.g. per unit of production volume, per facility).	Green Development Environmental Statistics
KPI A2.2	Water consumption in total and intensity (e.g. per unit of production volume, per facility).	Green Development Environmental Statistics
KPI A2.3	Description of energy use efficiency target(s) set and steps taken to achieve them.	Green Development Green Data Center
KPI A2.4	Description of whether there is any issue in sourcing water that is fit for purpose, water efficiency target(s) set and steps taken to achieve them.	Green Development Green Data Center Low-carbon Office
KPI A2.5	Total packaging material used for finished products (in tonnes) and, if applicable, with reference to per unit produced.	Our operations do not involve the production of physical products, and KPI A2.5 is not applicable
A3：The Environment and Natural Resources		
General Disclosure	Policies on minimizing the issuer's significant impacts on the environment and natural resources.	Green Development Addressing Climate Change Green Data Center Low-carbon Office
KPI A3.1	Description of the significant impacts of activities on the environment and natural resources and the actions taken to manage them.	
A4：Climate Change		
General Disclosure	Policies on identification and mitigation of significant climate-related issues which have impacted, and those which may impact, the issuer.	Green Development Addressing Climate Change
KPI A4.1	Description of the significant climate-related issues which have impacted, and those which may impact, the issuer, and the actions taken to manage them.	

"Comply or explain" Provisions		
Subject Areas & Aspects		
B Social		
Employment and Labor Practices		
B1：Employment		
General Disclosure	Information on: (a) the policies; and (b) compliance with relevant laws and regulations that have a significant impact on the issuer relating to compensation and dismissal, recruitment and promotion, working hours, rest periods, equal opportunity, diversity, anti-discrimination, and other benefits and welfare.	Prioritizing Tale Creating a H Supporting E
KPI B1.1	Total workforce by gender, employment type (for example, full- or part-time), age group and geographical region.	Prioritizing Tale Human Reso
KPI B1.2	Employee turnover rate by gender, age group and geographical region.	Prioritizing Tale Human Reso
B2：Health and Safety		
General Disclosure	Information on: (a) the policies; and (b) compliance with relevant laws and regulations that have a significant impact on the issuer relating to providing a safe working environment and protecting employees from occupational hazards.	Prioritizing Tale Creating a H
KPI B2.1	Number and rate of work-related fatalities occurred in each of the past three years including the reporting year.	Prioritizing Tale Human Reso
KPI B2.2	Lost days due to work injury.	Prioritizing Tale Human Reso
KPI B2.3	Description of occupational health and safety measures adopted, and how they are implemented and monitored.	Prioritizing Tale Creating a H
B3：Development and Training		
General Disclosure	Policies on improving employees' knowledge and skills for discharging duties at work. Description of training activities.	Prioritizing Tale Supporting E
KPI B3.1	The percentage of employees trained by gender and employee category (e.g. senior management, middle management).	Prioritizing Tale Human Reso
KPI B3.2	The average training hours completed per employee by gender and employee category.	Prioritizing Tale Human Reso

B4：Labor Standards		
General Disclosure	Information on: (a) the policies; and (b) compliance with relevant laws and regulations that have a significant impact on the issuer relating to preventing child and forced labor.	Prioritizing Talent Development Creating a Happy Workplace
KPI B4.1	Description of measures to review employment practices to avoid child and forced labor.	
KPI B4.2	Description of steps taken to eliminate such practices when discovered.	
Operating Practices		
B5：Supply Chain Management		

General Disclosure	Policies on managing environmental and social risks of the supply chain.	Sustainable Supply Chain
		  Supplier Management Requirements
		  Supplier Full Lifecycle Management
		  Responsible Procurement
		  Supplier Capacity Building

KPI B5.1	Number of suppliers by geographical region.	Sustainable Supply Chain Supplier Full Lifecycle Management

KPI B5.2	Description of practices relating to engaging suppliers, number of suppliers where the practices are being implemented, and how they are implemented and monitored.	Sustainable Supply Chain
		  Supplier Management Requirements
		  Supplier Full Lifecycle Management

KPI B5.3	Description of practices used to identify environmental and social risks along the supply chain, and how they are implemented and monitored.	Sustainable Supply Chain Supplier Full Lifecycle Management
KPI B5.4	Description of practices used to promote environmentally preferable products and services when selecting suppliers, and how they are implemented and monitored.	Sustainable Supply Chain Responsible Procurement
B6：Product Responsibility		

General Disclosure	Information on:
	(a) the policies; and
	(b) compliance with relevant laws and regulations that have a significant impact on the issuer
	relating to health and safety, advertising, labelling and privacy matters relating to products and services provided and methods of redress.
		Business Ethics
		  Intellectual Property Management
		Responsible Operations
		  Product and Service Excellence
		  Data Security and Privacy Protection

"Comply or explain" Provisions

Subject Areas & Aspects		
KPI B6.1	Percentage of total products sold or shipped subject to recalls for safety and health reasons.	Our operations of physical pro applicable
KPI B6.2	Number of products and service related complaints received and how they are dealt with.	Responsible Op Product and
KPI B6.3	Description of practices relating to observing and protecting intellectual property rights.	Business Ethics Intellectual P
KPI B6.4	Description of quality assurance process and recall procedures.	Responsible Op Product and
KPI B6.5	Description of consumer data protection and privacy policies, and how they are implemented and monitored.	Responsible Op Data Security
B7：Anti-corruption		
General Disclosure	Information on: (a) the policies; and (b) compliance with relevant laws and regulations that have a significant impact on the issuer relating to bribery, extortion, fraud and money laundering.	
KPI B7.1	Number of concluded legal cases regarding corrupt practices brought against the issuer or its employees during the reporting period and the outcomes of the cases.	Business Ethics Integrity
KPI B7.2	Description of preventive measures and whistle-blowing procedures, and how they are implemented and monitored.	
KPI B7.3	Description of anti-corruption training provided to directors and staff.	
Community		
B8：Community Investment		
General Disclosure	Policies on community engagement to understand the needs of the communities where the issuer operates and to ensure its activities take into consideration the communities' interests.	Fulfilling the Co Cloud for Go Public Welfar
KPI B8.1	Focus areas of contribution (e.g. education, environmental concerns, labor needs, health, culture, sport).	
KPI B8.2	Resources contributed (e.g. money or time) to the focus area.
